❖ Intern | ConsultAdd Inc.

Feb 2024 – July 2024

- Assisted In planning and executing engineering projects, contributing to report preparation and technical specifications.
- Communicated with clients, gathering requirements, providing updates, and participating in meetings and presentations.
- Collected and analyzed project data, using management tools to organize information for informed decision-making

SKILLS

❖ Database

MongoDB

❖ Languages

Java, C++, SQL, HTML5, JavaScript

❖ Frameworks

React, Node.js, Express.js , React Redux

❖ Tools

GitHub, Git

PROJECTS

❖ Expad Blogging Website:

- Worked with a team using React, Node.js, and MongoDB to build Expad, ensuring seamless blog posting and user interaction features.
- Developed and integrated RESTful APIs using Node.js and Express, enabling efficient data retrieval and dynamic content management for blog posts.
- Integrated MongoDB for efficient blog post storage and retrieval, ensuring secure and scalable management of user-generated content.

❖ Personal Portfolio:

- Designed and developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- Utilized advanced CSS animations and JavaScript libraries to create engaging effects, such as hover states, modal pop-ups, and scrolling animations.
- Integrated JavaScript to dynamically generate and manage content, allowing for easy updates and maintenance without altering the HTML structure

❖ **Gemini Clone using Google API:**

- Created a Gemini clone using the Google API and React, integrating custom functions for seamless data retrieval and user interaction.
- Focused on delivering an intuitive UI with efficient performance and dynamic features.

CERTIFICATION

❖ **Web Development Training | Internshala Trainings**
